 **WashTec**

SoftCare Pro Classic XL 320: *New size – more functions –* *high versatility*

➤ **SOFTCARE PRO CLASSIC XL 320: TAKE YOUR WASHING BUSINESS TO THE NEXT LEVEL!**

➤ **EXTENSIVE EQUIPMENT FEATURES**

Perfect for washing cars through to large vans up to 3.20 m high. All standard transporters – even those with an ultra high roof – fit in the machine. Side dryers with more powerful blowers and higher flow ducts that go up to the side windows of vans.

➤ **VAN MIRROR PROGRAMME**

Thanks to a smart software control system, the machine automatically recognises the vehicle type during the washing cycle and, if need be, starts the van mirror programme by itself. This machine software causes the side brushes to rotate forwards and backwards such that the folded in wing mirrors cannot be forced out again.

➤ **MOTOR HOME WASH OPTION WITH ALCOVE PROGRAMME**

During the alcove programme, the machine steers the roof brush from the windscreen back to the front, automatically manoeuvring round the front end of the roof. This means that motor home manufacturers, dealers and rental companies can now also replace the arduous task of washing by hand with an automatic vehicle washing system in proven WashTec quality.
